Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims.

Therefore, the two side discs “mounted concentrically on opposite sides” of the main disc as set forth in claims 7 and 9 must be shown or the features canceled from the claims. None of the figures shows more than a single disc.

No new matter should be entered.

2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 1, 7, 9, 11, 12, and 13 are allowable over the prior art of record.

Response to Arguments

4. Applicant's arguments filed May 23, 2005 have been fully considered but they are not persuasive.

The Examiner does not agree with Applicant's assertion that side discs are shown in the drawings. A review of figures 7-12 finds that none of these figures gives any indication that anything more than a single disc is present. Figures 10-12 clearly show a single, monolithic disc. No side discs mounted on opposite sides of the main disc are present.

The specification does describe side discs, and states that they are "mounted" to the sides of the chainwheel disc, but the drawings do not show this. In fact, Applicant's own arguments on page 7, second paragraph, state the side discs (the elements with reference number 50, 50') are "integrally formed" on opposite sides of the chainwheel disc. Discs integrally formed on the sides of a disc are quite different from discs which are mounted to the sides of a disc.

Conclusion

5. This application is in condition for allowance except for the formal matters set forth in paragraph 1 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
